2026 SR22T G7+ OWNERSHIP PROGRAM

New Cirrus SR22T G7+ GTS, shared ownership

Program at a Glance

Aircraft	New Cirrus SR22T G7+ GTS
Total ownership units	16
Shares available for purchase	15
Ownership per share	1 of 16 units (6.25%)
Capital per share (Program Cost)	$106,538
Annual Program Fee per share	$33,976
Flying hours per share per year	Up to 96
In-flight connectivity	Included · Starlink
Garmin Safe Return	Included
bop Aero hourly-use fee	$0

You own the aircraft. bop Aero manages it. There is no bop Aero occupied-hour fee to use an aircraft you already own.

Ownership is held in units: each share holds 1 of 16 units and bop Aero retains one unit (6.25%). Owner program costs are allocated across the fifteen (15) shares available for purchase. You may purchase more than one share, up to the number offered at the time of purchase. Unit counts are distinct from the number of legal owners; ownership terms are subject to final legal review.

SR22T G7+ GTS - NEW AIRCRAFT PROGRAM

Program Structure

1. Ownership Structure

Total ownership units	16
Shares available for purchase	15
Ownership per share	1 of 16 units (6.25%)
bop Aero retained	1 of 16 units (6.25%)
Owner cost allocation	6.67% per owner share

2. Acquisition & Capitalization

Aircraft acquisition value (Cirrus SR22T G7+ GTS with options)	$1,395,500
Connectivity equipment & installation	$3,851
Estimated use tax (7.8% of aircraft value)	$108,849
Acquisition / closing / registration / setup	$89,870
Total program capitalization	$1,598,070
Capital per available owner share	$106,538

3. Annual Program Economics

Aircraft fixed costs (insurance, storage, maintenance, subscriptions)	$91,508
bop Aero management	$240,000
Future Value Reserve	$178,129
Total annual requirement	$509,637
Available owner shares	15
Annual Program Fee / owner	$33,976

4. Operating Costs

bop Aero hourly-use charge	None
Fuel / oil / TKS fluid	Owner actual operating cost
Crew, when required	Owner actual cost
Airport / handling costs	Owner actual cost
Artificial occupied-hour markup	None

5. Features

In-flight connectivity	Included · Starlink
Garmin Safe Return emergency autoland	Included

6. Access

Fifteen owner shares, each with its own yearly flying hours, and one interest retained by bop Aero. Each share permits up to 96 flying hours per year.

The program aircraft is a new Cirrus SR22T G7+ GTS, ordered with the options listed in the program and equipped with Starlink connectivity.

BRIDGE AIRCRAFT AND REPLACEMENT CYCLE

Bridge Aircraft

The program starts flying before the new aircraft arrives. Until the new Cirrus SR22T G7+ GTS is delivered, owners fly bop Aero's pre-owned bridge aircraft. The new aircraft is acquired when a 2026 (or newer) aircraft becomes available from Cirrus Aircraft.

Bridge aircraft	2022 Cirrus SR22T G6 GTS
Program aircraft on delivery	New Cirrus SR22T G7+ GTS
Garmin Safe Return emergency autoland (bridge aircraft)	Not included · introduced with the G7+
Garmin Safe Return emergency autoland (program aircraft)	Included

The bridge aircraft is a Cirrus SR22T GTS of an earlier generation. Its equipment differs from the program aircraft as shown. Terms that apply during the bridge period are set out in the ownership agreement.

Five-Year Future Value Reserve

The program is designed around a five-year replacement cycle: the new aircraft is replaced with another new aircraft. The Future Value Reserve, part of the Annual Program Fee, is designed to support the gap between the net resale proceeds of the existing aircraft and the cost of its new replacement.

Program	Aircraft Value	Annual Reserve	5-Year Reserve	Purpose
G7+	$1,395,500 new	$178,129	$890,645	New-to-new replacement

The reserve is designed to preserve the program replacement cycle without adding a bop Aero hourly-use charge.

COST CONSIDERATIONS

Program Variables

Final program pricing is confirmed when the aircraft is ordered. Cirrus pricing, installed options, insurance, tax treatment and the five-year replacement requirement can affect the final economics.

Sensitivity to Changes in Annual Aircraft Cost

Change in Annual Aircraft Cost	Impact per Owner Share (15 shares)
$5,000	+$333
$10,000	+$667
$25,000	+$1,667
$50,000	+$3,333

What Is Included in the Annual Program Fee

Category	Treatment
Aircraft fixed costs	Included in Annual Program Fee
bop Aero management	Included in Annual Program Fee
Future Value Reserve	Included in Annual Program Fee
bop Aero occupied-hour charge	**None**
Fuel, oil, TKS fluid and consumables	Actual owner operating cost
Crew, airport and handling	Actual owner operating cost, when applicable

Owners pay the actual cost of operating their aircraft. bop Aero does not add an occupied-hour charge for the privilege of using an aircraft the owners already own.

Final pricing is established in the applicable ownership and management agreements.

HOW THE OWNERSHIP PROCESS WORKS

From Share Purchase to Aircraft Delivery

Step	What Happens
1. Choose your shares	Select one or more of the fifteen (15) owner shares, based on the flying hours you need each year.
2. Confirm program economics	Cirrus pricing, installed options, taxes, insurance, fixed costs and the Future Value Reserve are confirmed in final pricing.
3. Complete owner commitments	Owners complete ownership documentation and fund their shares.
4. Fly the bridge aircraft	Owners fly bop Aero's pre-owned bridge aircraft while the new aircraft is on order.
5. Take delivery of the new aircraft	bop Aero acquires, equips and places the new SR22T G7+ GTS into service for the ownership group, including Starlink connectivity.

Program at a Glance

Program	Shares Available	Capital / Share	Annual Program Fee	Hours / Share / Year
G7+	15	$106,538	$33,976	Up to 96

A new Cirrus SR22T with the cost shared across the ownership group, managed by bop Aero, with no hourly-use charge.

Important Cost Notes

Program pricing and annual fees may change based on Cirrus pricing, taxes, insurance, installed equipment and market conditions. Operational costs such as fuel, oil, TKS fluid, crew and owner-pilot training are not included in the Annual Program Fee unless specifically stated. Final economics and program terms are established in the applicable ownership and management agreements.
